^(**) If default Cd= 0,25 is chosen, then results from cycling tests are not required. Otherwise either the heating or cooling cycling test value is required

Product Fiche

Model: HI-COMFORT PLUS 12000 UE / HI-COMFORT PLUS 12000 UI

Manufacturer: ARGOCLIMA SPA - via Alfeno Varo, 35 - Alfianello (BS) - Italy;

Sound power level (indoor unit / outdoor unit): 54 / 61 dB(A);

Refrigerant: R32

Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675 .This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1 kg of CO₂, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

Cooling mode

SEER: 6,2

Energy efficiency class: A++

Pdesignc: 3,4 kW

Annual electricity consumption **192** kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.

Heating mode

Climate type: Average (-10°C) / Warmer (+2°C) / Colder (-22°C)

SCOP: 4,0 / 5,1 /-

Energy efficiency class: A+/A+++/-

Pdesignh: 2,3 / 3,1 /- kW

The back up heating capacity for SCOP calculation: # kW.

Annual electricity consumption **841/797/-** kWh per year, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
